

Steven Scoville

Junior Software Developer | Associate Software Engineer Candidate

Hardinsburg, KY • s.scoville.dev@outlook.com • 608-217-8096 • <https://github.com/s-scoville> • <https://www.linkedin.com/in/steven-scoville-2288701a3/>

Security Clearance: Previously held Secret Security Clearance (U.S. DoD)

Professional Summary

Junior software developer pursuing a Bachelor of Science in Information Technology with hands-on experience designing modular C#/.NET applications and building structured, maintainable backend logic. Strong foundation in object-oriented programming, API concepts, SQL fundamentals, version control workflows, and secure software practices. Seeking an entry-level backend engineering role contributing to scalable API-driven systems while growing within a collaborative fintech or platform-focused team.

Technical Skills

Languages: C#, HTML, CSS, SQL (Working Knowledge), JavaScript (Foundational)

Frameworks / Tools: .NET (WinForms, .NET Core Fundamentals), Git, GitHub, Visual Studio, VS Code

Data / Formats: JSON, File-Based Data Storage

Concepts: Object-Oriented Programming (OOP), REST API fundamentals, SDLC, Event-Driven Programming, Debugging, Version Control, Basic Software Testing, Separation of Concerns

Operating Systems: Windows

Projects

UtilitySuite — C# Console Application

Personal Project | GitHub: <https://github.com/s-scoville/UtilitySuite>

- Designed and built a modular C#/.NET console application structured around reusable services and clean separation of concerns.
 - Implemented structured input validation, centralized business logic, and menu-driven navigation simulating controller-style request handling patterns.
 - Designed file-based persistence layer using serialization techniques with error handling and data integrity safeguards across sessions.
 - Applied object-oriented principles, scalable architecture planning, and version-controlled development practices with atomic commits and structured documentation.
-

Education

Bachelor of Science in Information Technology — Sullivan University

Current GPA: 3.93

Expected Graduation: **June 2027**

Relevant Coursework: Introduction to Programming, Visual Programming, Web Design, Intermediate Website Design (in progress)

Associate Degree in Criminal Justice — 2016

Experience

Dispatcher — Stoughton Trailers

- Maintained accurate trailer location and asset tracking logs using internal systems and spreadsheets.
- Coordinated assignments between drivers, yard operations, and dispatch schedules to optimize workflow efficiency.
- Identified and corrected data discrepancies, improving reliability of operational reporting.

Security Officer / Supervisor — Multiple Organizations

- Authored detailed incident reports and maintained procedural documentation with high accuracy standards.
- Trained and mentored new personnel on operational procedures and compliance expectations.
- Demonstrated strong situational awareness, accountability, and decision-making under pressure.

Military Police — U.S. Army

- Enforced safety, security, and operational procedures in high-responsibility environments.
- Developed discipline, teamwork, leadership, and consistent execution under structured protocols.
